GENERAL PROVISIONS

1. Summary settlement violations are specific. This summary settlement schedule is to be applied to violations of the provisions

ALASKA REGION SUMMARY SETTLEMENT SCHEDULE

listed above. If a violation does not appear on this schedule, then the violation has been deemed unsuitable for summary settlement and is to be handled using the applicable penalty schedule.

2. This summary settlement schedule is divided according to the regulatory regime, statute, or regulation violated. Each part contains either Category I violation, Category II violations, or both. With the exceptions noted in paragraphs 3 and 4, Category I violations are those violations for which the summary settlement schedule will always apply, no matter how many times a person commits the Category I violation.

With the exceptions noted in paragraphs 3 and 4, Category II violations are those violations for which the summary settlement schedule will apply only to first time violators. Application of the summary settlement schedule for Category II violations is appropriate only in those instances where the authorized officer has confirmed that the subject's history of violating the regulation and determined whether the summary settlement schedule is available. Should a person commit a Category II violation and the person also has a prior violation of that Category II offense, the summary settlement schedule should NOT be used and the violation should be handled under the penalty schedule.

3. The summary settlement schedule may not be used for cases where the authorized officer has reasonable cause to believe that the violation was a knowing, intentional act or where there are aggravating circumstances.

4. If an authorized officer discovers a Category I or II violation in addition to violations that are not addressed under this summary settlement schedule, then the officer may remove the Category I or II violation from the summary settlement schedule and address it under the applicable penalty schedule.

5. Any references to C.F.R. section numbers are provided for guidance on where a particular regulatory requirement can be found. Due to frequent amendments to these sections, the regulatory citation is not controlling and should be checked to ensure accuracy.
